POTENTIAL NATURAL FIBRE COMPOSITE TO BLAST LOADING

Lecture by guest Professor Dr. Mohd Yazid Yahya

Prof. Yazid (H-index: 26) is a highly respected expert in the field of composite materials, particularly in the areas of composite structures, pressure vessels, impact, ballistic and blast loading, and interlaminar fracture toughness. His extensive research and experience make him a valuable asset to the field. He is director of the Centre for Advanced Composite Materials (CACM) at Universiti Teknologi Malaysia (UTM) further solidifies his position as a leading researcher in the field. TUL and UTM signed an MoU in 2024.
